KINGSLEY C. NDUKAUBA

Kayceendukauba@gmail.com | Bowie, MD

Summary

Incoming IT Auditor at Kearney & Company and current Student Ambassador, leveraging hands-on experience as an IT Help Desk Technician and an academic background in Data Science. Proven track record in risk-based auditing, internal controls testing, network security, and compliance documentation. Skilled at blending technical troubleshooting with predictive risk modeling to ensure robust compliance standards across enterprise systems.

Skills

- **Security & Frameworks**: NIST CSF, RMF, Zero Trust, Threat Detection Modeling, YARA Rules, AI Risk Assessment.
- **System Administration**: Windows 10/11, Linux/Unix, OS Internals, Active Directory, User/Group Admin, Patching, Logging.
- **Networking & Infrastructure**: TCP/IP, DNS, DHCP, Firewalls, IDS/IPS, Routing/Switching, Network Segmentation, Wireshark.
- **Programming & Databases**: Python, Java, JavaScript, Bash, PowerShell, MySQL, PostgreSQL.
- **Tools & Virtualization:** VMware Workstation, VirtualBox, Git/GitHub.

Experience

Kearney and Company
Information Technology Audit Intern
06/2026 – 7/2026

- Collaborated with IT teams to analyze system configurations, access controls, and cybersecurity practices for comprehensive audit insights
- Assisted in IT audit processes, conducting risk assessments, control testing, and compliance reviews to support senior auditors
- Documented findings and prepared workpapers, contributing to audit reports to ensure accuracy and adherence to regulatory standards.

Mount St. Mary's University | Emmitsburg, USA
Information Technology Help Desk
05/2025 - Current

- Delivered frontline technical support to 50+ students, faculty, and staff weekly, diagnosing and resolving hardware/software issues with a 90% first-contact resolution rate.
- Installed, configured, and maintained desktops, laptops, printers, and peripherals, achieving a 25% reduction in recurring technical issues through proactive maintenance and updates.

Mount St. Mary's University | Emmitsburg, USA
Tech Assistant – Palmieri's Activity Center
09/2024 - 04/2025

- Managed daily technical operations for the university's main event center, ensuring on-time launch of 20+ large-scale campus events without disruptions.
- Set up lighting, sound, and mic systems under tight deadlines, adapting to last-minute changes for seamless event execution.

Mount St. Mary's University | Emmitsburg, USA
Data Analyst Intern
08/2024 - 12/2024

- Analyzed large university datasets related to facilities, student engagement, and event operations, translating findings into actionable recommendations that reduced bottlenecks by 15%.
- Developed visualizations and dashboards in Excel, enhancing decision-making speed for administrators.

CareFirst Arena | Washington, USA
Event Production Assistant & Time-Out Coordinator (Freelancer)
11/2025

- Organized, repaired, and secured broadcast cables and technical equipment during pre-event setup for a major basketball game, ensuring a smooth production environment.
- Managed media time-outs as Time-Out Coordinator, communicating with production staff to maintain the event's broadcast flow.

Education

Mount St. Mary's University | Emmitsburg, MD
Bachelor of Science in Computer Science & Cybersecurity, Data Science
Expected in 05/2027

Certifications

COMPTIA Security+
Issued Jul 2026 | Expires Jul 2029

Projects

Multithreaded Syscall Simulation (May 2026)
C Programming Language, Kndukauba/Multithreaded_Syscall_Simulation: Design and Implementation of a Scalable Multithreaded System Call Simulator for Concurrent Multi-Client Interaction.

- Expanded the architecture of a syscall simulator to support multi-client interactions through threads and parallel operations. Gained hands-on experience using mutexes to safely manage and protect shared data structures updated concurrently by multiple clients and the main system thread.

Anatomy of an Executing Program Research (March 2026)
Visual Studio, C, Process Explorer, VMMap, Procmon

- Conducted a deep analysis of process creation and memory mapping.
- Analyzed process-loaded libraries, syscall trace evidence, and redirected file creation evidence.
- Created architectural modeling that demonstrated findings and analysis, which included the loader and process initialization, system call execution path, interrupt and driver completion, and virtual memory layout.

Activities

MPC Programming Club Leader

- Led weekly coding sessions with 10+ members, focusing on problem-solving in Python, Java, and JavaScript.

- Organized peer-led workshops and Clash of Code challenges through Discord to improve members' collaboration and programming skills.
- Attended the 2026 CCSC Annual Conference at Bowie State University in the Programming competition, enhancing technical proficiency in programming.

Cyber Defense Club Member

- Competed in the National Cyber League (NCL) Fall 2025, developing hands-on skills in cybersecurity challenges.
- Applied knowledge of cryptography, open-source intelligence, web exploitation, and forensics to solve real-world security scenarios.
- Strengthened technical expertise in Linux command-line operations, network traffic analysis (Wireshark), and vulnerability scanning tools.
- Attended the 2025 & 2026 CCSC Annual Conference at Arcadia and Bowie State University and competed in the Capture the Flag competition, enhancing technical proficiency in cryptography, forensics, and other cybersecurity fields.
